

STL TD-2

SUMMARY:

With its Generation III 3-watt LEDs, this STL deck and dash light provides powerful take-down functionality.

- Powered by 12V
- 6 Generation III 3-watt LED take-downs
- Non-Striated TIR Optic
- Sleek, durable casing
- Multiple flash patterns
- Non-volatile memory recalls last flash pattern
- Lifespan of up to 100,000 hours
- Anti-glare coating on outer lens
- Flash pattern changer is located on unit
- Includes cigarette plug with On/Off switch
- Includes choice of suction cup or L-brackets
- Includes removable windshield reflector
- Includes 10 feet of cable
- Dimensions: 8" L x 1.75" H x 2.25" D
- 7 day money back guarantee
- 2 year warranty*

*Please test **all** products prior to installation to ensure proper function.

*Please note: Per the limited warranty, accurate installation of STL products requires the installer to have a good understanding of automotive electronics, procedures, and systems. STL products are of professional grade and professional installation is highly encouraged.

Instruction Manual:

1. Insert the cigarette lighter plug into the cigarette plug adaptor of your vehicle and power your unit on using the on/off with switch.
2. You may also cut off the cigarette lighter plug for a hardwired solution.

3. Once the cigarette lighter plug is removed you will have two power cables, one red (hot), and one black (ground), which you will take to your battery or other 12v power supply.
4. You will want to ensure your grounding cable is taken directly to the negative terminal of your battery to avoid any feedback which may disrupt your STL product.
5. When Utilizing suction cups, make certain to only use the smaller mounting screws provided in the suction cup baggies as they are of proper length.
6. Use of any other screws may puncture the PCB and render the unit inoperable.
